# Implant Studio 2022.1
What's new

Overview of new features, **improvements, and changes**

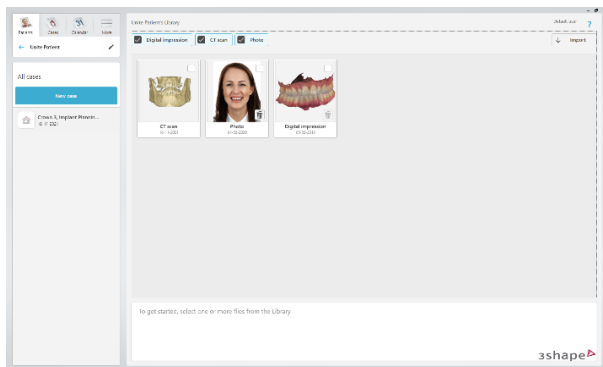

January 2022

Let's change dentistry together

3shape

Implant Studio 2022.1

3Shape Implant Studio is now on 3Shape Unite! Utilize the new case handling and flexibility of the media library. At the same time, the new version of Implant Studio brings general improvements resulting in a smoother and more responsive workflow.

- **NEW** Unite
  Implant Studio 2022.1 is now an app on Unite. Workflows can be started either from scratch or by selecting relevant input scans in the patient media library. In either case, use the 'Studios' action to start the workflow.

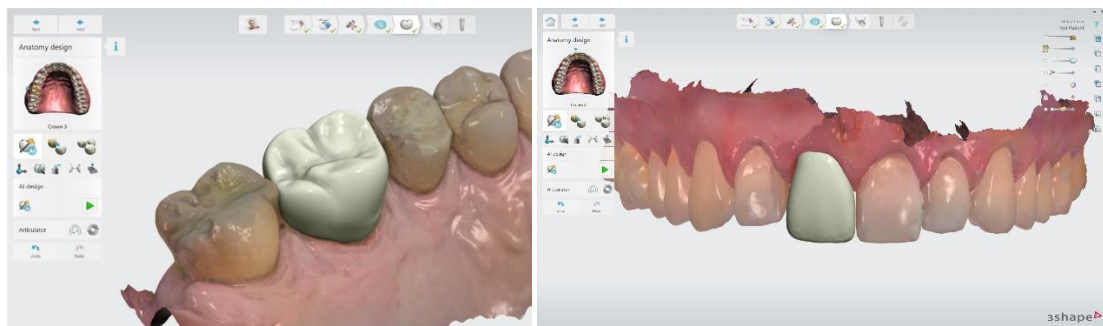

- **NEW Implant Studio general improvements**
  Implant Studio workflow has been updated, making the scan preparation part of the workflow faster and smoother.

- **AI Crown 2.0**
  Implant Studio 2022.1 is supporting artificial intelligence in the Anatomy Design step to propose a crown design, making the workflow much faster and easier. AI crown 2.0 is our most capable and aesthetic framework for designing crowns ever.

With the new workflow, you can concentrate on taking the informed decision on placing the implant, with AI suggestion for prosthetics of crowns, as well as the classic automatic suggestions for scan preparation.

1. Please note that AI-functionality requires internet connection and a connected 3Shape Communicate account.

2. Please note, pre-release version will initially only support pre-molars and molars

Resolved issues

- **Bugfixes**
- **Additional machines/materials added**

Patches

Release	Date	Comments
Implant Studio 2021.3	November 2021	AI Virtual crown proposals and design placement
Implant Studio 2022.1	January 2022	Unite and actions
